**Intended use**
A very high sensitivity calcium thromboplastin for simultaneous determinations of Prothrombin Time (PT) and Fibrinogen (Fb), for evaluation of the extrinsic coagulation pathway and monitoring Oral Anticoagulant Therapy in human citrated plasma on the IL Coagulation Systems.

**Principle**
The PT-FIB HS PLUS is a lyophilized rabbit brain extract with an optimal thromboplastin with stabilizers, polybrene and buffer.

**Precautions**
Avoid contact with skin and eyes (S 24/25). Do not enter into drains (S 29).

**Additional reagents and control plasmas**

**Specimen collection**
Specimen collection and handling and storage. 2
citrate.

**Recommended performance characteristics**

**Recommended precision and correlation**

**Thromboplastin certification**
